Wunderlich Protection

“Only those who risk going too far can possibly find out how far one can go.”

Wunderlich protection parts ensures your investment is well protected. We have a full line of protection parts to keep your bike protected and running whether it is a day trip on your favorite local road or an extended multi week trip to a remote far flung destination. Keeping your bike well protected is of utmost importance. We have developed Engine Bars that can take a beating, Valve Cover Guards that reliably protect the vulnerable boxer engine cylinder heads, Skid Plate System that completely protects the underside of your R1250 GS, Headlight Guards to protect against kicked up rocks, Sliders and Brake Caliper Protectors to ensure your brakes and forks are always guarded. We have also developed a unique skid plate for the final drive. You can count on Wunderlich's German Engineered Parts to keep you on your journey!

Protection for your Adventure

Wunderlich Engine Protection Bars

The result of more than three decades of experience in constructing engine protection bars, we have developed this stylish and durable engine protection bar that guarantees to deliver what it promises - strong, safe, light, low-maintenance.

- ▷ Minimal weight
- ▷ Protects both oxygen sensors
- ▷ No restriction of ground clearance
- ▷ Perfect protection for the cylinders and valve covers
- ▷ Uniform distribution of the forces over 3 attachment points on each side of the motorcycle
- ▷ Available in five colors
- ▷ High quality stainless steel with high tensile strength and break elongation
- ▷ Complete with all needed hardware
- ▷ Made in Germany

■ Black	Part # 26442002	\$474.95

Adventure Style Tank Bars

This tank guard not only reliably protects the tank, but also the fairing, steering stem & the dual radiators. In conjunction with the engine guard, it forms a well-thought-out all-round protection concept for passive safety: In the event of a fall or accident, the forces are optimally distributed via the guard structure to the load-bearing pick-up points, thus avoiding force peaks.

- ▷ Fits Wunderlich and Original Engine Guards or any other cylinder protection
- ▷ Sophisticated all-round protection
- ▷ Protective function and integrated product design
- ▷ Available in six colors
- ▷ High quality 18-25mm precision steel
- ▷ Even distribution of forces
- ▷ Perfect, model-specific fit
- ▷ Made in Germany

Wunderlich has designed an 11 Piece Frame Plug Set to fill the open frame mounts on BMW's GS models. This not only adds visual appeal but also prevents dirt & debris from collecting in the empty holes.

WUNDERLICH

MADE IN
EUROPE

Wunderlich Engine Case Protector

The Boxer engine cover has to handle stone impacts, kicked up spray and road dirt thrown up by the front wheel as well as the mayhem on the freeway. To protect the engine cover, we have developed and carefully designed our contour-fit engine protection cover using tough, impact-resistant and durable plastic. The engine case protector provides mechanical stability because of its low weight and reliably protects the engine. The engine protection cover is attached with 4-points and is a visual upgrade to the engine design.

- ▶ Maximum, reliable protection for the front engine cover against the nicks and scratches of kicked up stones, spray and road dirt
- ▶ Made in Germany

Engine Protector Part # 42772002 \$151.95

Wunderlich Fuel Injection Cover

The injector cover protects the intake manifold area along with the injection pipe, pipe connections and the throttle position sensor. Boots and pants can cause snagging which in turn creates leaks on the connectors. This is no longer possible with this protective cover made of anodized aluminum. Additionally, it protects against moving of the plugs and connectors. Visually, the cover flows & follows the lines of the motorcycle.

- ▶ Protection for the sensitive pipe sockets, connectors, the throttle position sensor and the injection pipe
- ▶ Abrasion protection for the complete injection and intake manifold units
- ▶ Made in Germany

Protection for your Adventure

Wunderlich Radiator Guards

The constant air stream while riding manages to suck up all sorts of things into the radiators. Stones, insects and grime fill up the delicate fins of the cooler and cannot be removed without extensive labor, often bending the cooler fins that will never look the same again.

Finely meshed stainless steel grills protect the cooler, ensuring that the cooling properties remain effective. This also greatly simplifies the cleaning and the mesh will always look as good as before.

- ▷ Anti-vibration mounting points
- ▷ Sold as a Set Left + Right
- ▷ Strong stainless steel mesh bonded to black anodized aluminum frame
- ▷ Blocks potential damage from reaching cooler.
- ▷ Made in Germany
- ▷ Easy to Install

Final Drive Protection Plate

The perfect protection for your BMW's paralever! Our Kardan guard sits beneath the rear axle drive and protects the hollow drilled rear axle and the paralever joint in case you get a little closer to the tarmac than you want. Effective protection both on the road as well as in active offroading.

- ▷ Reliably prevents damage to the final driveline housing
- ▷ Easy assembly, no modifications necessary
- ▷ Slim and discreet design tailored to the Kardan but still highly effective
- ▷ Made in Germany
- ▷ Can be removed without leaving a trace
- ▷ Tested extensively in development
- ▷ Perfect protection on or off-road

Wunderlich AKTIVKOMFORT Seats

Available for both
Rider & Passenger
in different
sizes &
colors.

AKTIVKOMFORT available with **HEATING**
to keep you comfortable on those **COLD** mornings.

Wunderlich AKTIVKOMFORT Seats

We manufacture our seats with a characteristic, ergonomic 3D contour that lets the rider become one with their BMW. The shape and angle of the carefully crafted, progressively structured, dual-layer seat core, which comes with an integrated carbon seat heating element, support the ergonomically beneficial, natural posture of the back. Integrated, riding is a relaxing affair and thus also active. And there's no doubt that relaxed sitting adds a serious plus to passive safety. With the ThermoPro coating, the temperature of this seat in direct sun at the peak of summer is up to 25°C lower compared to standard, untreated cover materials. We also have a passenger seat in the range to go with this.

Find the Perfect Seat for Your Journey.

They offer perfect hold and active, reliable control during accelerated riding, also and especially when braking. The innovative, ergonomic 3D contour also ensures that pressure points on the inner thighs while standing at the lights are now a distant memory.

- ▷ Tall, Standard or Low Versions Available
- ▷ Standard, HP & 40th Anniversary Color Options
- ▷ Heated or Standard with No Heating
- ▷ Cover material with ThermoPro covering
- ▷ Progressive, dual-layer seat core structure
- ▷ Made in Germany.

Heated Seats	Part # 42720602-702	\$899.95
Standard Seats	Part # 42720402-502	starting at \$538.95

40th Edition Passenger	Part # 42720509-919	starting at \$569.95

The "buckling" of the cushioning is reliably prevented via the sophisticated construction and the sitting pressure is equally distributed over a large area, resulting in noticeably lower specific pressure load to your behind. Comfy! Also typically Wunderlich: The incorporated concave profile for relieving the pressure-sensitive coccyx is another outstanding trademark!

Wunderlich Marathon Windscreen

Great comfort for long, relaxed trips. Wunderlich wind screens offer excellent protection and comfort. The screen is directed toward the rider and it is adjustable, like the original, to provide the maximum protection for all body sizes. The screen offers the rider a smooth and turbulence free riding experience.

- ▷ Dimensions: 20-5/8" X 18-3/4"
- ▷ Maximum protection for head, upper body and arms.
- ▷ Made from very robust, optically pure and petrol-resistant Lexan plastic.
- ▷ Built-in flow channel: Changing the height on the screen also adjusts the aperture, which counterbalances turbulence with a calming reverse flow.

Side Wind Deflector Set

A tiny action with an amazing effect. Annoying turbulence often arise due to a number of issues. The standard screens are just part of this problem. To make sure you can enjoy a turbulence free ride, it's necessary to develop a total concept for optimum wind pressure relief.

- ▷ Effective protection against turbulence
- ▷ Five millimeter thick scratch- and shatterproof acrylic plastic
- ▷ Easy assembly no modification necessary
- ▷ Ideal compliment to Marathon Series Windscreen

Fits: R1250 GS

Wunderlich Fender Extender

The rear section of the front fender is not long enough to effectively keep road debris off the exhaust and front of the engine. The result is dirty headers and engine cases, clogged up oil coolers, stone damage to the radiator and unnecessary water splashing is irritating. The Wunderlich fender extender solves this problem effectively and elegantly. Made of tough ABS plastic the extender attaches to the original fender.

Extender Part # 27830100 \$75.95

Looking for a more aggressive look? Our "FlowJet" is an ideal alternative to a conventional windshield when riding off road or in hot climates.

FlowJet Part # 42730002

Our Inner Fender protects the feet and lower legs of the rider and passenger from spray and road dirt while also protecting the rear suspension

Inner Fender Part # 40821102

Wunderlich Handlebar Muffs

Heated grips, if present, only warms the palms of the hands. The best protection for cold hands is reliable heat insulation and the avoidance or exclusion of convection. The best means for this: Well thought out, constructed, high-quality handlebar muffs. Our handlebar muffs can be universally used on a whole range of motorcycles. They consist of water-repellent and dirt-proof, high-quality CORDURA® fabric and slip on the left and right end of the handlebar and are also equipped with a cuff that attaches to the mirror arm via an adhesive band and zipper, thereby being tightly sealed. The grips in the muffs can also be closed tight thanks to an elastic cord that comes with a stopper.

Our handlebar muffs also come with a moulded insert that is cushioned on the inside. This feature ensures that the muffs retain their shape at high speeds and in the subsequent high wind pressures, thereby creating a solid, protected space that provides thermal insulation and ensures the safe, unhindered use of the instruments and levers with your hands. The molded insert is especially helpful and advantageous if you don't have any hand protectors mounted. We've incorporated a generously sized UV-stable PVC transparent window around the switcher units for the instruments that allows you to use them safely and reliably. Our muffs are so generously sized that they also fit over the hand protectors.

The handlebar muffs are fitted with reflective elements. The functional high-quality design of our handlebar muffs has nothing in common with the conventional simple solutions found on the market. They are constructed using a great deal of experience and are exclusively manufactured from high-quality materials. Specially developed motorcycle handlebar muffs for all motorcycles equipped with and without hand protectors guarantee a lot of riding fun – even at the lowest temperatures.

- ▶ Quick and easy mounting
- ▶ The molded insert always ensures safe operation of brake, clutch and controls
- ▶ Easy, quick installation
- ▶ Protects the hands from the cold, moisture, wetness, dirt, stone impacts and insects
- ▶ Reflective elements for greater safety

Black Part # 25200100 \$189.95

Comfort on your Adventure

Hand Guard Extender Set

Cold, clammy or wet hands are unpleasant, just like stone impacts, road dirt of any kind or insects splatters at high speed. With our hand protector extension, we have significantly enlarged the protective zone of the original protectors, in height as well as width, and we've also extended it outwards on the side around the hand and up to the end of the handlebar. You can't get any more protection, but you should definitely have this level of protection. These measures have allowed us to decidedly improve protective efficiency. We have equipped the upper edge with a water-deflecting collar that extends outwards; it guides spray water outwards and lets it flow off the sides.

- ▷ Dimensions: 10" width and 6" high
- ▷ Rounded, perfectly finished edges with water-bearing properties
- ▷ Easy, quick installation
- ▷ Protects the hands from the cold, moisture, wetness, dirt, stone impacts and insects

<input checked="" type="checkbox"/> Black	Part # 44940002	\$175.95
<input type="checkbox"/> Tinted	Part # 44940006	\$175.95
<input type="checkbox"/> Clear	Part # 44940005	\$175.95

Wunderlich Hand Guards

We have equipped our hand protectors with a water-deflecting collar that extends outwards; it guides spray water outwards and lets it flow off the sides. Functionality aside, our Hand guards are designed to be discreet and attractive. The Hand guards are made of acrylic, are thermally stable, scratch and shatter-proof and resistant to gasoline. They are quick and easy to mount. They can be used with or without grip heating as well as handlebar end weights and our cruise control.

- ▷ Maximum protection during everyday use
- ▷ Rounded, perfectly finished edges with water-bearing properties
- ▷ Highly durable, scratch and shatter-resistant
- ▷ Protects the hands from the cold, moisture, wetness, dirt, stone impacts and insects
- ▷ Available in: white, clear, tinted and black
- ▷ Quick and easy mounting
- ▷ Made in Germany

Vario ERGONOMIC Footrest System

Our Vario Ergonomic Footrest System is the ultimate solution when it comes to ergonomic adjustable footrests. With an adjustment range up to 100 mm diameter, it leaves nothing to be desired. No matter whether you've got big feet or small ones, whether you want to increase the lean angle freedom or just comfortably relieve the knee angle. The eight different adjustment options within a full 360 degrees ensures enormous flexibility. This ergonomic adjustment foot peg system is available for both rider and passenger.

- ▷ Available in Silver or Black
- ▷ Rider & Passenger Adapters
- ▷ Rotates 360 Degrees in 8 Positions
- ▷ Made in Germany

Wunderlich USB Dual Socket

The USB dual socket is designed to replace the original BMW DIN socket. It also does away with wobbly adapters. The socket installs in the same position and using the original connector. This means no soldering or cabling of a new line are required.

- ▷ Replaces the original BMW DIN socket
- ▷ Plug and Play system

Dual USB Outlet Part # 45011000 \$79.95

Wunderlich MultiClamp The GO TO Versatile Universal Mount

TESTED BY
WUNDERLICH

Wunderlich MULTICLAMP System

The MultiClamp universal clamp is highly versatile. Using the removable toggle (included in the scope of delivery) together with a spindle, you can easily and reliably attach it to the handlebar, tank protection and engine protection bars or the luggage rack. The MultiClamp is suitable for all pipes with a diameter of 10 to 32 mm. The special feature here is that the sophisticated clamping mechanism makes it suitable for round and square pipes, but also for flat profiles up to 32 mm such as you would find on many luggage racks. Once attached, you can remove the toggle to avoid theft. The MultiClamp comes with a ball joint that can be rotated 360° and locked. Together with the quick release system, it provides a versatile use base for accommodating the MultiClamp Smartphone or ActionCam holders.
